Index to Volume VI

A

Accident evidence by photography 129
Airbrush and its use—Carl D. Clarke 101
Airbrush—alterations and additions to photographs 101
Airbrush for pigments 108
Airbrush—Paasche 103
Airbrush—retouching photograph 101
Airbrush—useful in making drawings of eye grounds 101
Alterations and additions on photographs by airbrush 101
Animated scientific drawing and cinematography 1
Animation apparatus—Bell and Howell 8
Animation apparatus—Clarke 23
Animation—cartoon stand—Norling and Leventhal 19
Animation—combining photographs and drawings 15
Animation—repeated use of drawings 12
Animation—short cuts 5
Animation stand. After Walt Disney 20
Animation—to slow up 18
Argus camera 33
Association News—Arthur W. Fuchs 41, 96, 140, 188
Autopsies—camera set up 62–64
Autopsies—with miniature camera 64
Autopsy room photography—John F. Pilcher 61
Avinoff, A., Director Carnegie Museum of Natural History. A color film of Jamaica 141

B

Back lighting cultures in tubes and flasks 54
Bacterial colonies, an inexpensive lapse-time device for recording the development of 145
Barker, A. R. Microphotography 176
Bell and Howell. Animation aapparatus 8
Binocular microscope for long wave length stereoradiographs—H. F. Sherwood 78
Bone tuberculosis 133
Brachial clefts and cysts 134
Bruner, J. M., and Cushman, G. W. Transurethral cinematography by means of moulage 89
Burns, old and new 134

Butterfield, John V. An illuminating system for large transparent sections in photomicrography 155

C

Capillary circulation in the mesentery of the rabbit—U. of Rochester, N. Y. and Eastman Kodak Co. 141
Chest deformities 134
Cinéphotomicrographic exposures, determining exposure time of photomicrographs with the Instoscope exposure meter and a circular slide rule for 161
Clarke, Carl D. 1, 101, 140
Clarke, Carl D. Animation apparatus 23
Clarke, Carl D. Fundamentals of animated scientific drawings and cinematography 1
Clarke, Carl D. His book on molding and casting 140
Clarke, Carl D. The airbrush and its use 101
Cohen, Dr. Milton. Complete operative and prosthetic technic for porcelain jacket crown restorations, 2400 ft. 16 mm. Kodachrome 142
Color films of various subjects 142
Color filter—simple rules for use 59
Complete operative and prosthetic technic for porcelain jacket crown restorations, 2400 ft. 16 mm. Kodachrome—Dr. Milton Cohen 142

D

Dekking, Dr. H. M., Director of the Eye Clinic at Nijmegen, Holland. His first portfolio of Atlas of Diseases of the Eye just published 140
Dental photography equipment 70–71
Dentistry—miniature camera 71
Dick, David W. Vitamin D assay routine 171
Dislocated hip 133
Documents and handwriting 128

E

Ear deformities 134
Examination of the prostate 91
Exposure time of photomicrographs with the Instoscope exposure meter and a circular slide rule for cinéphotomicrographic exposures 161

F

Face—4 views in dental photography 69
Facial surgery records 69
Foot and wrist drop 133
Frisket paper masks 113
Fuchs, Arthur W. Association News 41, 96, 140, 188
Fundamentals of animated scientific drawings and cinematography—Carl D. Clarke 1

G

Graff, John H. Determining exposure time of photomicrographs with the Instoscope exposure meter and a circular slide rule for cinéphotomicrographic exposures ... 161
Gravelle, Philip O. Reflecting focusing device ... 50

H

Harding, F. R. Lighting paramount in clinical photography ... 132
Harding, F. R. Phantom photographs ... 91
Harding, F. R. Photographic technic, new processes, and equipment ... 184
Hemangioma ... 134
Hobby photography ideal for dentists and medical men ... 77

I

Immobilizing small specimens in liquid ... 53
Inexpensive camera for gross and slightly enlarged photographs ... 36
Infra-red—used on document photography ... 129
Instoscope exposure meter, determining exposure time of photomicrographs with the, and a circular slide rule for cinéphotomicrographic exposures ... 161

J

Jamaica, a color film of—Carnegie Museum of Natural History, A. Avinoff, Director ... 141
Julin, Leonard A. Surgical motion pictures, equipment and technic ... 25

K

Knight, Prof. Paul. Photographing the periodical cicada, Leica-Kodachrome ... 142
Kodak x-ray developing powder ... 135

L

Lapse-time device for recording the development of bacterial colonies, an inexpensive ... 145
Lighting paramount in clinical photography—F. R. Harding ... 132

M

Massopust, Leo C. Transmission—radiations through chemical solution recorded by infra-red plate ... 140
Material for animation drawing ... 4
Microphotography ... 176
Miniature camera photography with the hand lens—Lawrance E. Shinn ... 33
Motion pictures of tissue cultures (ciliated epithelium)—Arthur W. Proetz, M.D. ... 84
Motion pictures—surgical ... 20
Motion pictures—surgical, avoid dramatic lighting ... 32
Motion pictures—surgical. From visitor's gallery. From stand for close-up ... 28–29
Motion pictures—surgical lighting units ... 29

Motion picture—surgical. Editing 31–39
Moulage transurethral cinematography 80
Molding and casting, his book on—Carl D. Clarke 145

N

New members 44, 97, 143
New rapid x-ray film developer 135
Norling and Leventhal. Animation—cartoon stand 19

O

Orthopedic subjects 132
Orthodontia in photography 68
Oral photography—England and Germany 67

P

Parafilm—for covering and sealing culture tubes—Menasha Products Company .. 39
Phantom photographs—F. R. Harding 91
Photographic technic, new processes and equipment 184
Photographing the periodical cicada, Leica-Kodachrome—Prof. Paul Knight 142
Photography and criminology—Louis A. Waters 124
Photography for dentists—Harvey W. Spencer 65
Photomacrograms made with enlargers—Eastman-Leica 58
Photomacrography—Louis Schmidt 47
Photomicrographs, determining exposure time of, with the Instoscope exposure meter and a circular slide rule for cinéphotomicrographic exposures 161
Photomicrographs of bullets 125–126
Photomicrography, an illuminating system for large transparent sections in 155
Pilcher, John F. Autopsy room photography 61
President's Address at the Rochester Convention 136
Proetz, Arthur W., M.D. Vibration-proof table for time lapse micro-ciné photography 85
Proetz, Arthur W., M.D. Motion pictures of tissue cultures (ciliated epithelium) . 84
Prosthodontia in portraits 68
Pulpit light—substitute illuminator 49–57

R

Range of mobility shown 91
Reflecting focusing device—Philip O. Gravelle 50
Reflex focusing device for photomacrography 49
Removing backgrounds from prints 118
Rubber cement formula 111
Rubber cement mounting 112

S

Scenario important in animation 2
Schmidt, Louis. Photomacrography 47

Schmidt, Louis. President's Address 136
Scoliosis 133
Sherwood, H. F. Binocular microscope for long wave length stereoradiographs.. 78
Shinn, Lawrance E. An inexpensive lapse-time device for recording the development of bacterial colonies 145
Shinn, Lawrance E. Miniature camera photography with the hand lens 33
Short cuts in animation 5
Small opaque objects under water to avoid glare 50
Sound never synchronized at time of animation 3
Spencer, Harvey W. Photography for dentists 65
Surgical motion pictures, equipment and technic—Leonard A. Julin 25
Surgical subjects 134

T

Tilting stage for opaque cultures 49
Transmission—radiations through chemical solution recorded by infra-red plate—Leo C. Massopust 140
Transurethral cinematography by means of moulage—J. M. Bruner and G. W. Cushman 89
Tumors in general 134

U

Uniform distance of light from subject 132
Use of tilting stage 54

V

Vibration-proof table for time lapse micro-ciné photography—Arthur W. Proetz, M.D. 85
Vitamin D assay routine 171

W

Waters, Louis A. Photography and criminology 124
500-watt light at top of background—its value 132
White duck in flight 2
